**CLOSEOUT MEMORANDUM**

Case Number: A 13080082

Page 1 of 1

We investigated an allegation that an NSF PO was violating COI guidelines by trying to obtain employment from an entity that was funded by NSF and for which she had some programmatic responsibility.

We reviewed all available records including the PO's subsequent work history and found no indication that she had violated COI guidelines. We also interviewed the Designated Agency Ethics Official (DAEO) who indicated that the PO had on two occasions sought and received conflicts guidance from the DAEO regarding potential post NSF employment.

Based on our review, we conclude that there is insufficient evidence that the subject violated any COI regulations.

This case is closed with no further action taken.
