CLOSEOUT MEMORANDUM

Case Number: I-16-0043-O

Page 1 of 1

NSF OIG received allegations that an NSF-supported PI at a university engaged in research misconduct and violated the NSF data sharing policy. In accordance with their policy and procedures, the university conducted a review and did not proceed to an Inquiry because they concluded the matter was due to differences of opinion. After additional review of the records, we concurred with the university and determined there was insufficient substance to the allegations to warrant further inquiry into the matter.

Accordingly, this case is **closed** with no further action.
