CLOSEOUT MEMORANDUM

Case Number: I-16-0063-O

Page 1 of 1

This case was opened following contact from another agency that identified SBIR awards made by it to a company whose personnel had also obtained funding from NSF through a university during the same timeframe, raising concerns of potential duplicate funding. We subpoenaed and reviewed company financial records as well as university personnel, time and effort, conflict of interest, and NSF award expenditure records. We also reviewed NSF project reports against the project reports filed with the other agency. Our investigation found no material issues related to NSF awards.

This case is closed with no further action taken.
