## CLOSEOUT MEMORANDUM

Case Number: I-17-0023-O

Page 1 of 1

We received an allegation that an NSF employee had improperly directed award funds to his home institution. Our investigation included interviews with NSF Ethics officials. A review of NSF award documentation indicated that the Subject was not involved in the approval process when the award to his home institution was being reviewed and/or recommended for approval, did not participate in any supplemental awards within the scope of the primary award, and did not participate in any other matters involving the Subject's home institution. Thus, the allegation was not substantiated.

This case is *closed* with no further action taken.
