CLOSEOUT MEMORANDUM

Case Number: I-18-0063-O

Page 1 of 1

We opened an investigation upon receipt of information that the Principal Investigator (PI) of several NSF awards was affiliated with another institution and did not disclose the affiliation on his NSF proposals or awards. We reviewed records obtained from the awardee and the PI and interviewed the PI. We found no evidence that the PI had actually accepted a position at the other institution. During the course of the investigation, however, award underspending was also identified. The PI was aware of the underspending, said it was due to a lack of students, and provided justification and notification to NSF in annual reports.

This case is **closed** with no further action taken.
