OFFICE OF INVESTIGATIONS

CLOSEOUT MEMORANDUM

Case Number: I-16-0052-O

Page 1 of 1

We received an allegation that a student who graduated from a NSF-funded university scholarship program failed to complete the two-year federal service requirement of the scholarship program. The allegation also stated that the university encouraged students to leave their service commitments before completion. We confirmed that the student completed the service requirement appropriately. We found no evidence that the university told students to end their service requirements early. Our investigation could not conclusively validate scholarship recipient information provided to us; therefore, we determined that further review of the national scholarship program is more appropriate for an audit than an investigation and made the referral to OA.

This case is closed with no further action taken.
