## CLOSEOUT MEMORANDUM

Case Number: I-20-0092-O

Page 1 of 1

We investigated allegations that an NSF Principal Investigator (PI) did not properly disclose his position with a foreign university in two NSF proposals. Our investigation substantiated the allegations but determined that the position with the foreign university ended prior to the NSF awards starting, and there was no scientific overlap in his foreign and NSF-funded projects. We determined that the PI received funds from another federal agency with which there is overlap, so we referred the matter to the other federal entity.

This case has been closed and no further action will be taken.
