CLOSEOUT MEMORANDUM

Case Number: I-23-0003-O

Page 1 of 1

We received an allegation that a proposal submitted to NSF contained text copied from a published article. Our review found copied text, but we determined that the plagiarism did not rise to the level of research misconduct. We sent the PI and co-PIs a questionable research practice letter reminding them about the importance of appropriate citation.

This case is **closed** with no further action taken.
